

NilaHub - Investor Screenshot Appendix

Standalone PDF appendix for investor outreach. This version is ready to hold product screenshots and already includes the visual capture plan, file names, and investor-facing captions.

Prepared: May 9, 2026

Status: Template ready, screenshots pending insertion

Minimum Screenshot Set

01. Launch / Login - docs/investor-screenshots/01-launch-login.png
02. Main Dashboard - docs/investor-screenshots/02-dashboard.png
03. Messaging Chat Window - docs/investor-screenshots/03-messaging-chat.png
04. Admin Dashboard - docs/investor-screenshots/04-admin-dashboard.png
05. E-commerce Marketplace - docs/investor-screenshots/05-ecommerce-marketplace.png
06. Wallet / Payments - docs/investor-screenshots/06-wallet-payments.png
07. Ride Booking - docs/investor-screenshots/07-ridesharing-booking.png
08. Live Ride Tracking - docs/investor-screenshots/08-ridesharing-tracking.png
09. SOS / Safety - docs/investor-screenshots/09-sos-safety.png
10. Reminder Workspace - docs/investor-screenshots/10-reminder-workspace.png
11. Diary / AI Insights - docs/investor-screenshots/11-diary-ai.png
12. Mobile App Shell - docs/investor-screenshots/12-mobile-app-shell.png

Screenshot Pages

Replace each placeholder with the final screenshot file before investor distribution.

1) Launch / Login

Placeholder

docs/investor-screenshots/01-launch-login.png

Caption

Branded product entry point for NilaHub across web and app surfaces.

What This Proves

The product has a polished entry experience and is not just a backend prototype.

Route / Anchor

src/components/Login.js,
src/components/LaunchPage.js

2) Main Dashboard

Placeholder

docs/investor-screenshots/02-dashboard.png

Caption

Unified dashboard connecting multiple high-frequency consumer and service modules.

What This Proves

The super-app vision is visible in a single operating shell.

Route / Anchor

/dashboard, src/modules/Dashboard.js

3) Messaging Chat Window

Placeholder

docs/investor-screenshots/03-messaging-chat.png

Caption

Real-time messaging interface with chat workflow, conversation history, and engagement surface.

What This Proves

Core daily-use behavior and a strong engagement loop.

Route / Anchor

/messaging, src/modules/messaging/Messaging.js

4) Admin Dashboard

Placeholder

docs/investor-screenshots/04-admin-dashboard.png

Caption

Admin dashboard for moderation, monitoring, and operational control.

What This Proves

The product includes an operations layer, not just end-user screens.

Route / Anchor

/admin-dashboard,
src/modules/admin/AdminDashboard.js

Screenshot Pages

Replace each placeholder with the final screenshot file before investor distribution.

5) E-commerce Marketplace

Placeholder

docs/investor-screenshots/05-ecommerce-marketplace.png

Caption

Marketplace browsing and product discovery flow within the NilaHub commerce layer.

What This Proves

The platform supports transaction-oriented commerce experiences.

Route / Anchor

/ecommerce, src/modules/ecommerce/Ecommerce.js

6) Wallet / Payments

Placeholder

docs/investor-screenshots/06-wallet-payments.png

Caption

Wallet and payment experience showing monetization infrastructure and transaction handling.

What This Proves

There is a visible path to payments and monetization.

Route / Anchor

src/modules/ecommerce/Wallet.js,
src/modules/ridesharing/components/payment/Wallet.js

7) Ride Booking

Placeholder

docs/investor-screenshots/07-ridesharing-booking.png

Caption

Ride booking workflow with pickup, drop, payment method, and service logic.

What This Proves

The product extends beyond messaging into service transactions.

Route / Anchor

/ridesharing,
src/modules/ridesharing/RideSharing.js,
src/modules/ridesharing/components/RideBooking.js

8) Live Ride Tracking

Placeholder

docs/investor-screenshots/08-ridesharing-tracking.png

Caption

Live ride tracking interface with map-based trip visibility.

What This Proves

Real-time operational UX and higher product sophistication.

Route / Anchor

src/modules/ridesharing/components/tracking/LiveMap.js

Screenshot Pages

Replace each placeholder with the final screenshot file before investor distribution.

9) SOS / Safety

Placeholder

docs/investor-screenshots/09-sos-safety.png

Caption

Emergency safety workflow with SOS escalation and trusted-contact support.

What This Proves

Differentiated trust and safety capabilities.

Route / Anchor

/sosalert, src/modules/sos/SOSAlert.js, src/modules/ridesharing/components/safety/SOSEmergency.js

10) Reminder Workspace

Placeholder

docs/investor-screenshots/10-reminder-workspace.png

Caption

Reminder and smart to-do workspace for repeat engagement and utility retention.

What This Proves

The product includes recurring-use utility modules beyond one-time transactions.

Route / Anchor

/reminderalert, src/modules/reminderalert/ReminderAlert.js

11) Diary / AI Insights

Placeholder

docs/investor-screenshots/11-diary-ai.png

Caption

Personal diary or AI insight workflow showing assistant-enabled product depth.

What This Proves

The platform includes AI-assisted or high-retention personal utility features.

Route / Anchor

/diary, src/components/AIInsights.js, src/modules/personaldiary

12) Mobile App Shell

Placeholder

docs/investor-screenshots/12-mobile-app-shell.png

Caption

Mobile app packaging view demonstrating Android-ready distribution and app portability.

What This Proves

The platform is not limited to desktop web.

Route / Anchor

capacitor.config.json, android/
